1. Read the following passage then answer the questions.(11 pts)

Palestinian people live all over the world. However, modern communications allow us to keep in contact. A hundred and fifty years ago, there were no phones and no email. It took weeks to send a letter to another country. And then it took several weeks to receive an answer. The telephone changed that.

The mobile phone allowed a second revolution in communications. Millions of people are now on the world's telephone network. With a modern mobile phone **they** can talk, send text messages, send or receive emails or use the Internet.

However, the mobile phone network does not work at the top of mountains or out at sea.

Sometimes **it** won't work outside of towns and cities. Satellite phones use satellites in outer space so they will work anywhere.

Video calls bring people's faces into our home. These use the Internet so all we need to do is put a small camera and a microphone on a computer.
